

## DISINFECTING PROCEDURE - UPDATED 6.17.2021

I am currently using **PREEMPT RTU cleaner** and **CLOROX DISINFECTANT** between appointments in my studio space. **PREEMPT RTU** disinfectant is required to remain wet on surfaces for 30 seconds before wiping, **CLOROX** spray cleaner needs 30 seconds of contact on surfaces. Clorox bleach mix is used for flooring when fully moping or spot cleaning.

### Patient Use Area:

- Chair (incl legs)
- Bin for patient belongings
- Coat hooks on wall
- Cell charging tray
- Tray for patient's items

### Therapist's High-touch Surfaces:

- Laptop, tablet, phone, square payment device
- Hepa Filter
- Hot Cabby - Outside
- Hot Cabby - Inside (if used)
- Aroma Diffuser
- Oil bottle(s)

### Massage Table Area:

- Massage table
- Massage table headrest
- Table legs near headrest
- Face cradle
- Stool (incl. handle and legs)
- Floor around head of table (spot clean)

### Miscellaneous Surfaces

- Door handles, cupboard edges and handles
- Cervical pillows, full-size pillows
- Cabinet & Drawers Handles
- Counter & Items (misc bottles & tray)
- Light switch, Lamp base and switch
- Any other surfaces touched by the RMT or the patient during the preceding treatment

### Deep Cleaning at End of Day

- Floor moped fully at end of day
- Wipe tops of Cabinet, edges of shelves
- Wipe mirrors
